

Wireless Magnetic Contact Sensor

The unique door/window magnetic contact with the emergency button in security industry . make sure more safety for user;
 · Induce the door or window open or close and gap in 10mm, the wireless transmission up to 80 meter.

Stable, stable performance, green.
 Flexible transmission capacity, frequency stability options.

● Features

SMQT

Multifunctional, the new model, patented design.

Tradition, stability, durability
 Imported touch reed switch
 Fire-retardant casing material, security and stability.
 Comes with emergency button, an accessory, a variety of uses.

Built-in battery, used or release anytime.

Smart power-saving built-in battery design, the sensor also can work at home even though power cut out, comes with high-energy battery, sustainable use of uninterruptible power supply

Reed , A special magnetic switch

Imports Reed touch than the general mechanical switch of simple structure, small size, high speed, long working life, and strong anti-shock load, high operating reliability.
