# PRODUCT FEATURE

Sealed integration structure is able to work in the harsh environment

Automatically regulate to be confronted with fog or inclement weather

Sensitivity (AGC circuit)

easily adjust and calibrate the horizontal/vertical optional angle

Built-in integrated optical telescopes, anti-jamming jacket

Anti-lighting circuit designed

High-power infrared receiver on the tubes, low-power digital

1. Sealed integration structure is able to work in the harsh environment.
2. Confronted with fog or inclement weather, the detector automatically adjusts the sensitivity (AGC circuit).
3. Easily adjust and calibrate the horizontal / vertical optical angle.
4. Built-in integrated optical telescope, equipped with an anti-jamming jacket.
5. Anti-lighting circuit.

6.high na kapangyarihan infrared receiver sa tubes, mababakapangyarihan digital.
