

Wired na infrared beam detector para sa sistema ng alarm ng intruder

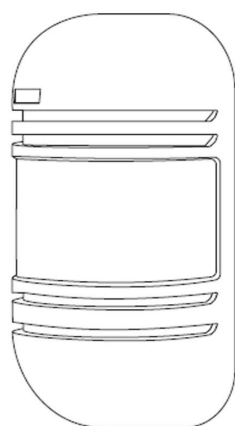

MABUTING MAGSIMULA SA ABT'S

Pangalan	Ang proteksyon ng wired perimeter ay na-infra beam detector
Model	ABT-30 ABT-60 ABT-100 ABT-150
Ang distansya ng pagtukoy sa labas	30m 60m 100m 150m (panlabas) (opsyonal)
Ang layo ng panloob na pag-detect	60m 120m 200m 300m 300m (panloob)
Boltahe ng pagpapatakbo	13.8-24VDC 11-18VAC
Operating kasalukuyang	40-65mA
Bilis ng induction	50-700m / seg
Kapaligiran temp	-20 ° C- 50 ° C
Output ng alarma	WALANG / NC
Anti-demolisyon output	NC
Pagsasaayos ng antas	180 ° (± 90 °)
Vertical adjustment	± 10 °
Materyal	PC dagta

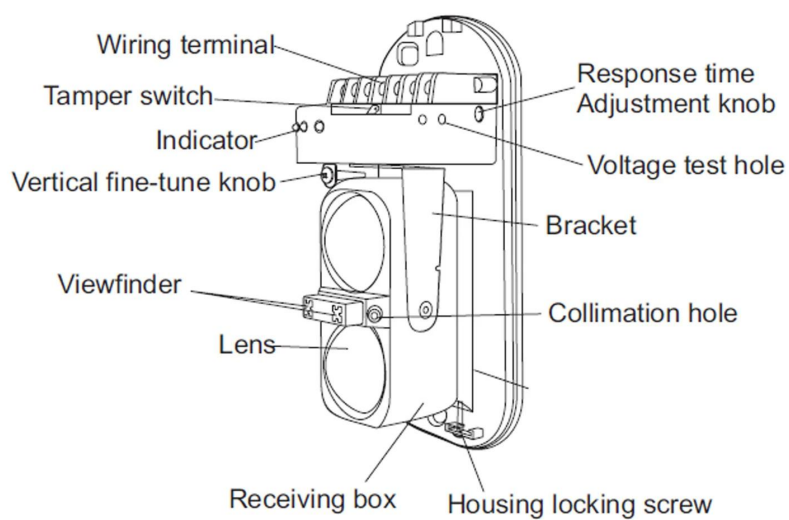

1. Ang pinagsamang istraktura na idinisenyo upang magtrabaho sa malupit na

kapaligiran.

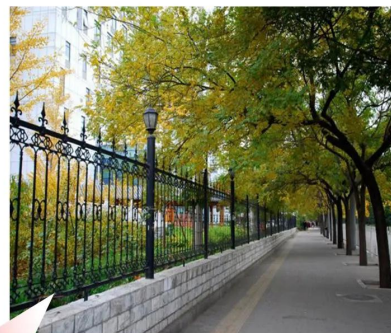

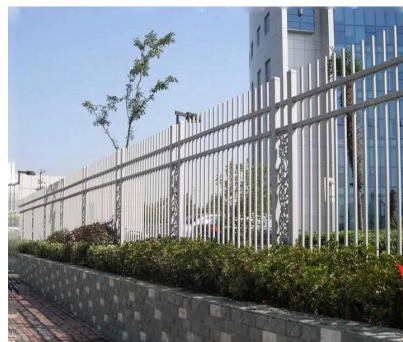

2. Kung nahaharap sa fog o inclement weather, ang detector ay awtomatikong madaragdagan ang sensitivity (AGC circuit).
3. Pahalang / patayo Optical anggulo madaling ayusin, madaling i-calibrate.
4. Ang built-in na pagsasama ng mga optical teleskopyo, gamitin ang propesyonal na anti-jamming optical jacket.
5. Disenyo ng circuit na anti-kidlat.
6. Mataas na Power Infrared na tatanggap sa tubo, Mababang-kapangyarihan digital.

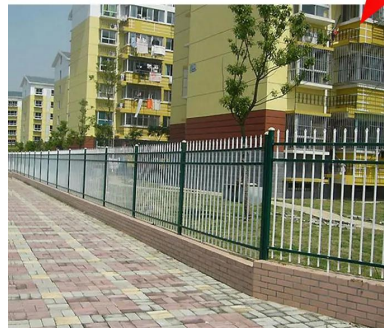

Housing

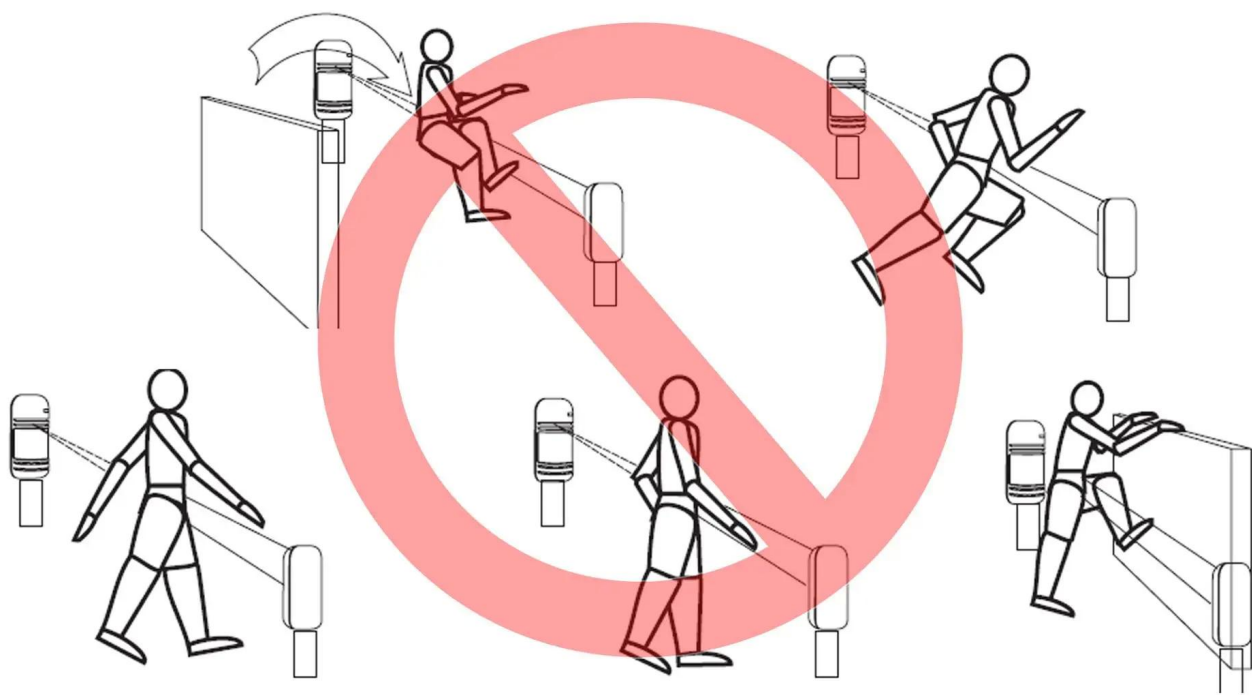

Perimeter Wall Protection

ABT 2 beams detector
