[illegible]

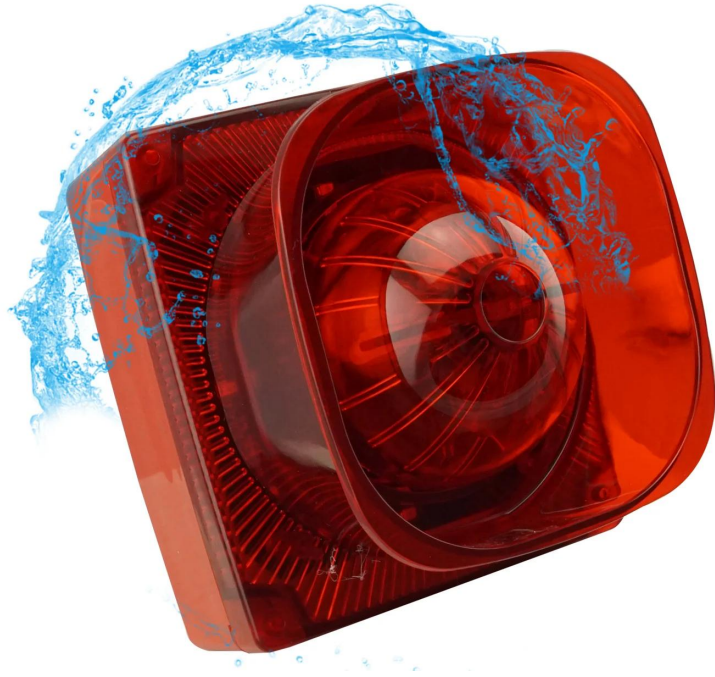

Technical drawings of the 100W LED lamp. The top drawing is a top view showing a square base with a diameter of 120mm and a height of 126mm. The bottom drawing is a side view showing a diameter of 107mm.

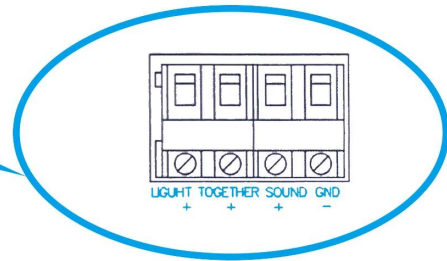

The image displays two views of a rearview mirror assembly, each consisting of a technical drawing and a corresponding photograph.

Front View: The top row shows the front of the mirror. On the left is a technical line drawing of a square mirror housing with a large circular mirror element in the center. To the right of the drawing is the word "Front" in blue text. On the right is a photograph of the actual red plastic mirror housing, showing the circular mirror element and the surrounding housing structure.

Side View: The bottom row shows the side of the mirror. On the left is a technical line drawing of the mirror housing from the side, showing the mounting bracket and the mirror element. To the right of the drawing is the word "Side" in blue text. On the right is a photograph of the actual red plastic mirror housing from the side, showing the mounting bracket and the mirror element.
